

Nehemia schools are an example of modern education in Albania. This is impossible without external financial support.

Some educational projects are able to cover partly their running costs through the school tuition and contributions (e.g. schools, kindergarten, seminars etc.). Yet, the expenses for quality management, premises or sponsorships exceed our budget by far. Therefore we are looking for people to participate in these projects.

It is crucial for us to guarantee a responsible handling of donations. Consequently, we make great demands on our accounting especially concerning precision and transparency.

Interested in donating? These are some examples for projects that need financial support:

- Personal sponsorships for children in need
 - Day care center
 - Full-time school (\$120/month)
 - Night school (\$120/month)
- "1000 for Education" (Project: BC BGY)
 - Donate 1000 \$ for our new high school
- Funds and subsidies for our university (Project: BC UNI)

■ Donations

Bank transfer to Albania:

Fondacioni NEHEMIA
ProCredit Bank
Rruga Rinia
Pogradec/Albania
Account no: 55-002422-00-02
SWIFT: FEFAALTR

Donations from the U.S:

Visit our cooperating mission in the U.S. online: www.gba.org
Donations for the building (or other purposes of your choice) will be transferred to Nehemia.

Donations via Credit Card/Pay Pal:

Visit our website: www.nehemia-al.org to find the appropriate links.

School and Education

School for Life

Education in Albania

Schools in Albania do not only suffer from extreme material scarcities: Curricula are theoretically oriented; there is no educational programme that aims at personal responsibility and social commitment. This results in an immense disinterest in public welfare and society.

Further problems:

- lack of motivation and education of the teachers
- Corruption on many levels of society
- bad condition of school buildings
- migration of young people, "brain drain"

Education at Nehemia

The Nehemia's vision is to support for the long term the development of the Albanian society according to Biblical values.

On the long run, this can only happen with the help of intensive educational work and Nehemia is there for two special target groups:

Gipsy children from poor families and disabled persons receive special support in school projects and care projects, combined with an intensive social work and support programmes for the families. The constant contact with families and neighbours allows the protection from child trafficking, a danger in which many of the children live constantly.

Talented children learn to live with a wholesome set of values from kindergarten up to university, receive an education at west-European level and can play in the future a decisive role in shaping their country.

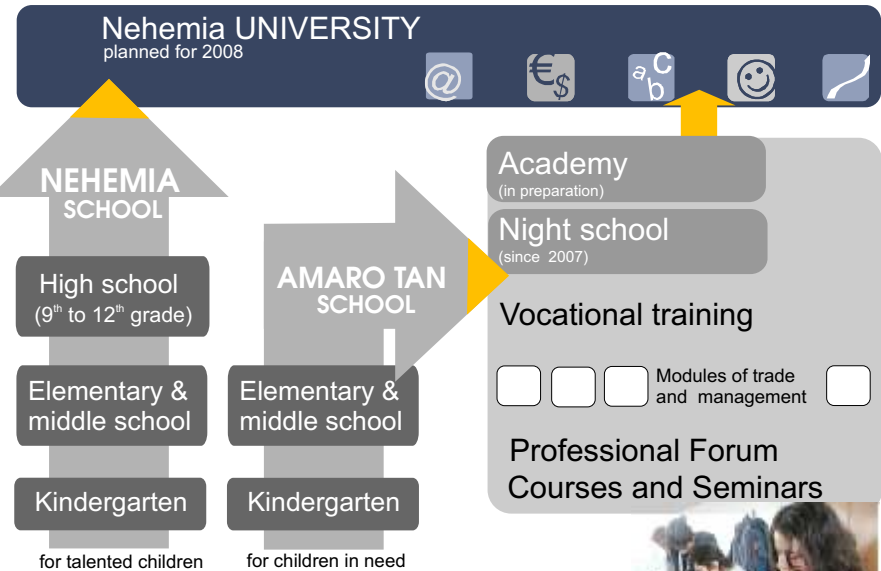

Nehemia: a school for life

Lirida - one example

Lirida has been one of the first students at Nehemia high school. She works with huge commitment and talent; her success in national and international competitions speaks for itself. Even external examiners certify her intellect, social behaviour, and personal development.

After a tragic accident, her family suffered from financial distress. Lirida was glad to find donators who cover the expenses for her school tuition within a personalized sponsorship. A well-earned support!

Nehemia educational structure

... plus

Further Nehemia projects for education and training:

- **Day care center**
In Durrës, children from Sinti and Romanies receive pre-school education and classes that aim at the integration and promotion of neglected children.
- **Sport programmes**
We organize various sports activities and trainings to communicate and practice social values in cooperation with Adi Dassler Fund (adidas).
- **"1000 for Education" campaign**
The fundraising project collects donations for the construction of new school buildings.
- **Support for state schools**
In addition, public educational institutions receive material help.

"I am very glad that I may attend the Nehemia school. Here I am in good hands, also in hard times. I could hardly find a better support in Albania. I would like to become a doctor to be able to transmit to others the good that I myself have experienced."
